# 14<sup>th</sup> HENNIG-Vertigo-Symposium 2025

## Invitation

Dear Colleagues,

Discover the power of your Sixth sense at our  
**14<sup>th</sup> HENNIG-Vertigo-Symposium in Hamburg!**

When we become aware of our Sixth sense, it often brings us pleasure. However, if we experience it at the wrong moment, it can lead to dizzying experiences that need treatment. Over the past two decades, the diagnostic approach to vertigo has become significantly more precise. One remarkable tool, the HINTS exam, can distinguish between central and peripheral vertigo without the need for any technology, often outperforming other methods. However, chronic vertigo remains a diagnostic challenge.

At our Symposium, we aim to unveil promising therapeutic advancements. We have invited globally recognized experts who are at the forefront of advancing vertigo diagnosis and treatment. We are delighted to welcome renowned speakers like Prof Nils Guinand, Prof Roberto Teggi and Prof Jose Antonio Lopez-Escamez who are shaping the future of this field.

Our Symposium will also focus on the daily challenges faced in general practice, both in diagnosis and treatment. In-depth lectures and practical courses will give you an opportunity to explore these challenges.

Get ready for a diverse and insightful program covering the latest developments in the field of vertigo, featuring highlights such as:

- The current clinical application of vestibular implants
- Functional surgery for the semicircular canals
- Diagnosis and treatment of Vertigo in the elderly
- Imaging techniques for Vertigo diagnosis

Yours,

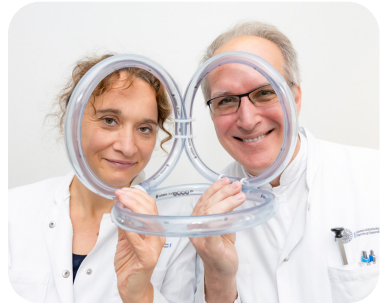

Univ.-Prof. Dr. med. Mark Praetorius  
Deputy Clinic Director  
UKE Hamburg

Prof. Dr. med. Katharina Stölzel  
Senior physician  
Helios Klinikum Berlin-Buch

Dr. Daniela Wirth-Hamdoune  
Head of Medical-Scientific Department  
HENNIG ARZNEIMITTEL GmbH & Co. KG

Join us for an **inspiring and informative journey through the latest in vertigo diagnosis and treatment** at our **14<sup>th</sup> HENNIG-Vertigo-Symposium in Hamburg.**
